

B Street School Tour

SPACE AND TECHNICAL REQUIREMENTS FOR B STREET SCHOOL TOUR:

Space Requirements:

At least 20' x 20' on the FLOOR* of an auditorium, gymnasium, cafeteria, etc.

We have a portable low stage that includes a sound system and a small lighting system. The set is completely self-contained with our own props and backstage.

The theatre troupe usually consists of 5 to 6 professional actors plus a road manager. B Street Theatre School Tour can play to an audience size of up to 450 students at one time. If the school has a student body of more than that or if the space will not accommodate the full student body, the troupe can do 2 shows back-to-back with just a 15-minute turnaround time.

Technical Requirements:

Clean and well-lit space

Electrical outlet

Use of 6 chairs and a small table once the actors have arrived at the school.

In compliance with Education Code Section 45125, the actors will not come into contact with pupils or work in the proximity of pupils at any time except under the direct supervision of District employees. The actors shall only use restroom facilities reserved for District employees and shall not use student restrooms at any time.

Set up Time:

The troupe needs, at most, one hour to set up their equipment. They need half an hour to pack up after the assembly. Please keep this in mind for schedule conflicts with uses of gyms and cafeterias.

*We discourage use of a school stage, as the dynamic is different when we are closer to the students. Also, we occasionally need to run through the audience or come from behind them.
